A thick black L-shaped frame surrounds the text. The top-left corner is a horizontal bar extending to the right, and the bottom-right corner is a vertical bar extending upwards. The rest of the frame is implied by the corners.

# How To Search for Scientific Information

Presented and prepared by:

Dr. Iman Elmahdi

# Intended Learning Outcomes

**By the end of this session you will be able to:**

- Identify the sources of scientific information.
- Identify how to search in a book
- Recognize how to search in an e-book
- Recognize search engine for academic information

# Scientific Information Resources

- Book
- E-book
- Journal Articles
- Website

# Searching in Book

- Select the relevant book to the topic.
- Identify the key words for your research.
- Search for the key words / phrases in the book index.
- Search for the topic/ phrases in book chapters.

## Index

### A

About cordless telephones 51  
Advanced operation 17  
Answer an external call during an intercom call 15  
Answering system operation 27

### B

Basic operation 14  
Battery 9, 38

### C

Call log 22, 37  
Call waiting 14  
Chart of characters 18

### D

Date and time 8  
Delete from redial 26  
Delete from the call log 24  
Delete from the directory 20  
Delete your announcement 32  
Desk/table bracket installation 4  
Dial a number from redial 26

Dial type 4, 12  
Directory 17  
DSL filter 5

### E

Edit an entry in the directory 20  
Edit handset name 11

### F

FCG, AGTA and IC regulations 53  
Find handset 16

### H

Handset display screen messages 36  
Handset layout 6

### I

Important safety instructions 39  
Index 56-57  
Installation 1  
Install handset battery 2  
Intercom call 15  
Internet 4

# Searching in Book

CHAPTER 3 | OUTLINE

However, point depends on the zero point. For example, the Celsius scale is an interval scale, but the Fahrenheit scale is an interval scale. However, we view temperature as a ratio scale because it is based on absolute zero. Measurement of time in years since some event is a ratio scale because the zero point of money—where we are usually quite happy to see the price of something drop—may not be quite meaningful for those of us who constantly max out our credit cards.

Most practical data mining systems accommodate just two of these four levels of measurement: **nominal** and ordinal. **Nominal** attributes are sometimes called **enumerated**, or **discrete**. Enumerated is the standard term used in computer science to denote a categorical data type; however, the strict definition of the term—namely, to put into one-to-one correspondence with the natural numbers—implies an ordering, which is specifically not implied in the machine learning context. **Discrete** also has connotations of ordering because you often discretize a continuous, numerical quantity. Ordinal attributes are generally called **numeric**, or perhaps **continuous**, but without the implication of mathematical continuity. A special case of the **nominal** scale is the **dichotomy**.

#### Notice

Medicine is an ever-changing science. As new research and clinical experience broaden our knowledge, changes in treatment and drug therapy are required. The authors and the publisher of this work have checked with sources believed to be reliable in their efforts to provide information that is complete and generally in accord with the standards accepted at the time of publication. However, in view of the possibility of human error or changes in medical sciences, neither the authors nor the publisher nor any other party who has been involved in the preparation or publication of this work warrants that the information contained herein is in every respect accurate or complete, and they disclaim all responsibility for any errors or omissions or for the results obtained from use of the information contained in this work. Readers are encouraged to confirm the information contained herein with other sources. For example and in particular, readers are advised to check the product information sheet included in the package of each drug they plan to administer to be certain that the information contained in this work is accurate and that changes have not been made in the recommended dose or in the contraindications for administration. This recommendation is of particular importance in connection with new or infrequently used drugs.

# Searching in eBook

The screenshot shows a PDF viewer window titled "Goodman & Gilman's The Pharmacological Basis of Therapeutics, 12e [Vishal]". The interface includes a search bar with the text "Type in the word(s) to search for:" and a search button. Below the search bar is a table with columns "Title", "Location", and "Rank", and a "Found: 0" indicator. At the bottom left, there are checkboxes for "Search previous results", "Match similar words" (checked), and "Search titles only". The main content area displays the following text:

**Stand on the shoulders of giants**

Google Scholar provides a simple way to broadly search for scholarly literature. You can search across many disciplines and sources: peer-reviewed papers, theses, books, abstracts and articles, from academic publishers, professional societies, preprint repositories, universities and other scholarly organizations.
